DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 05, 2004 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1-8 and 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite since it is unclear as to how the charged species source and drain mount/connect to the movable component and to the exact functional/structural relationship among the charged species source and drain, the movable component, and the first and second protrusions.

Independent claim 1 is incomplete because there is no the electronic-charge-transferring device found as a result of performing the steps cited in the claim and there is no actual manufacturing step(s) in the claim(s).

Art Unit: 3729

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,955,818 to Bertin et al.

Bertin et al disclose a method of manufacturing a device comprising: providing charged species source and drain (16 left and right in Fig. 1); and positioning a movable component (18) having a size of a micrometer scale or smaller (Microstructure), in a close proximity to the charged species source; positioning a first and a second protrusions (16 top and bottom in Fig. 1) having a size of a micrometer scale or smaller proximate to the moveable component.

Allowable Subject Matter

6. Claims 4-8 and 21-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-8 and 21-24 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3729

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
